SUMMARY REPORT
FT 930-I

June 1965

FOR RELEASE
August 13, 1965

IMPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the increase in U.S. general imports of merchandise from $1,724.1 million in May to $1,906.9 million in June[1] [2] reflected increases in imports of 7 of the 10 Schedule A commodity sections. The more notable increases were in imports of manufactured goods classified chiefly by material; mineral fuels, lubricants, and related materials; and inedible crude materials, except fuels.

Imports of manufactured goods classified chiefly by material increased from $459.5 million in May to $526.5 million in June, due to increases in imports of copper and alloys (refined blister and mill shapes), from $26.6 to $44.5 million; universals, plates and sheets, from $45.0 to $57.8 million; standard newsprint paper, from $64.9 to $72.4 million; and aluminum and alloys (primary and mill shapes), from $24.2 to $30.7 million. Increases in imports of crude petroleum, from $76.4 to $127.3 million; and fuel oil, from $54.0 to $60.3 million; were the primary causes of the increase in imports of mineral fuels, lubricants, and related materials from $154.7 to $214.4 million.

The increase in inedible crude materials, except fuels, from $247.4 to $272.4 million was largely the result of increases in imports of iron ore and concentrates, from $42.7 to $51.8 million; lumber, from $29.5 to $36.4 million; and wood pulp, from $31.0 to $36.4 million. Imports of miscellaneous manufactured articles rose from $151.3 to $169.0 million due to increases in imports of clothing (excluding footwear) from $37.0 to $50.4 million, and toys, sporting goods and amusement equipment, from $11.3 to $16.5 million.

The increase in imports of new passenger cars, from $46.3 to $54.6 million was the chief cause of the increase in imports of machinery and transport equipment, from $230.8 to $247.8 million. Imports of food and live animals increased from $290.6 to $304.1 million, primarily due to an increase in imports of coffee, from $77.2 to $89.6 million. Commodities and transactions not classified according to kind increased slightly from $65.4 to $66.3 million.

The decrease in imports of unmanufactured tobacco from $15.8 million in May to $2.4 million in June was the chief cause of the decrease in imports of beverages and tobacco, from $47.6 to $33.3 million. Animal and vegetable oils and fats decreased from $11.8 to $8.3 million; while chemicals decreased slightly from $64.9 to $64.7 million.

[1] On a seasonally adjusted basis, total general imports were valued at $1,834.8 million in June as compared to $1,798.9 million in May. (See the June 1965 issue of Report FT 900-I.

[2] Except for approximately $10 million, June statistics exclude the relatively small amount of merchandise on board U.S. vessels arriving at domestic ports during the period June 15-30, but not unloaded during this period because of the maritime strike against some U.S. shipping lines.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the U.S. armed forces for their own use. U.S. trade with Puerto Rico and U.S. possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the U.S. import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through U.S. Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from intransit merchandise only in the manner in which it is documented.

VALUATION: The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the U.S. import duties, ocean freight and marine insurance.

RELIABILITY: Monthly import statistics for individual commodities are based on full compilation of all formal entry shipments valued $100 and over (over 99 percent of total import value) and are therefore free of sampling variability. They are, however, subject to some error due to the omission of informal entry shipments (i.e. those valued under $250) and under $100 formal entry shipments from commodity statistics, and also from such sources as the carryover of data from month to month in the compiling process and errors in the reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account particularly in using figures of relatively small magnitude. The largest variation from rounding of figures is $50,000.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Report FT 125. For complete statement see foreword in Foreign Commerce and Navigation of the United States.

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10¢ per copy.
Annual subscription (FT 900, 930, 950, 970, 975, 985, and 986 combined) $5.00.

U.S. GENERAL IMPORTS OF MERCHANDISE BY SELECTED SCHEDULE A COMMODITY GROUPINGS AND PRINCIPAL COMMODITIES
JUNE 1965 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. General imports are commodities imported for immediate consumption plus entries into bonded warehouse. Imports for consumption are commodities imported for immediate consumption plus withdrawals for domestic consumption from bonded warehouses. Figures for 1965 are as originally issued and have not been revised to include published corrections. Figures for 1964 include all revisions published with December 1964 reports, or earlier, but do not include revisions published during 1965. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts)

Copper and alloys.....value..	43.7	28.8	223.8	34.2	31.3	196.9
Bauxite, crude, refined (alumina), and calcined.....value..	11.4	12.2	70.8	10.4	9.5	62.7

See footnotes at end of table.

Commodity description and unit of quantity[1]	1965			1964		
	June	May	Jan.-June	June	May	Jan.-June
Nonferrous metals - crude, blister, refined, mill shapes and scrap--Continued						
Aluminum and alloys.....value..	32.6	24.6	125.6	19.1	17.8	105.2
Nickel and alloys, including nickel oxide.....value..	16.8	15.9	98.0	10.9	13.5	79.1
Tin and alloys.....value..	13.0	13.1	73.5	8.4	7.3	51.1
Manganese and chromium ore and metal (excluding ferroalloyed forms)[4 5]....value..	7.2	6.2	41.2	6.4	5.1	31.8

*Statistics for May over-counted because of larger than normal carry-over of April shipments.

- Represents zero.

Z Indicates less than $50,000.

[1]Based on the commodity classifications listed in Schedule A, Statistical Classification of Commodities Imported into the United States, as published in the special Census Bureau publication entitled "Changes in Presentation of U.S. Import Statistics Effective 1964." A "Supplement" to Report FT 930-I showing the coverage for the individual commodity totals in terms of the Schedule A classifications is available on request.

[2]Excludes, also, wool-like hair of other animals (see footnote 8) whether on or off the skin. Wool and wool-like animal hair on the skin are included under "Hides and skins, undressed, except fur skins;" cashmere goat-hair is included with "Fur skins, undressed." All unmanufactured wool and wool-like animal hair, whether on or off the skin, are combined in Part III of this table under the summary grouping "Wool unmanufactured (including on the skin)." See footnote 8.

[3]Consolidated in Part III of this table with similar commodities, dispersed among one or more other Schedule A commodity sections in Part II, and shown under appropriate descriptive headings.

[4]Includes ores of base-metals customarily used as ferroalloying materials: manganese, chromium, tungsten, titanium, molybdenum, vanadium, zirconium, etc.

[5]Includes base metals customarily used as ferroalloying materials but not yet processed into ferroalloys. (See footnote 4, above.)

[6]Parts and accessories for agricultural tractors are shown under "Transport equipment."

[7]Formal import entries valued at less than $100 and informal entries valued at $250 or less.

[8]Includes carbonized wool and wool-like hair of other animals, on or off the skin—e.g. camels hair, alpaca, cashmere, vicuna, angora, etc.
